INSTRUCTIONS

Using the micro USB cable supplied insert the micro USB connector into the micro USB port on the charger and then insert the standard USB connector (other end of cable) into any standard USB charging port with a maximum approved power source of 5V/2A. Place your Qi compatible phone with inductive (wireless) charge feature onto the charger's charge plate (back of phone to charger) in either a horizontal or vertical position. The height of the charge plate may need to be adjusted to align the charge plate with your phone's charge area. Refer your phone user manual for its wireless charge area. Using the height adjustor button on back of the charger lower or raise the charge plate until your phone shows its charging in the normal way.

Note – only devices which support Qi wireless charge technology can be wirelessly charged from this charger, please check your devices specifications.

- ① Insert into base
- ② Turn left 90°

Caution, only connect the charger to an approved charging device with a maximum approved power source of 5V/2A otherwise personal injury or device damage may occur. Use either the charge cable supplied with the charger or a certified cable. Do not drop, disassemble or modify this product. Do not expose this product to fire or excessive heat. Do not expose this product to water or excessive humidity. Do not put any bare metal on the surface area of the wireless charger when its operating.
